# Rishabh Pant

Dehradun, Uttarakhand | rishabhpant1395@gmail.com | +91 7456876613 | linkedin | github

## Professional Summary

Computer Science Engineering graduate with practical experience in building software projects using Python, web development technologies, and machine learning. Developed applications in compiler design, operating system, and recommendation systems while strengthening software development and problem-solving skills. Seeking an Software Developer role to contribute to building reliable, scalable applications.

## Technologies

Programming: C/C++, Python, Java, HTML, CSS, JavaScript
Frontend: React.js, Tailwind CSS, Bootstrap
Frameworks & Libraries: Streamlit, TensorFlow, Scikit-learn
Databases: Oracle SQL (SQL*Plus), MySQL
Tools: Git, GitHub, VS Code

## Projects

ASM-Fusion (Assembly to C code Translator)

- Built a live code-translation system that converts assembly instructions into clean, readable C code in real time.
- Designed a backend that parses instructions, handles edge cases, and generates equivalent C constructs with high accuracy.
- Improved conversion reliability by adding rule-based mappings for arithmetic, memory, and jump instructions, reducing manual correction work.
- Tech Stack: C++, HTML, CSS, JavaScript.

LoadHarbour (A Stable and Efficient File Processing Hub)

- Built a file processing platform that automatically distributes incoming file tasks across multiple processing nodes to balance the workload and prevent the system overload.
- Designed the task queue and scheduling logic to ensure files are processed in an organized and efficient manner.
- Used Python multithreading to process multiple file tasks simultaneously, improving the system's responsiveness.
- Tech Stack: Python, Threading, Scheduling Algorithms.

Movie Recommendation System (Content-Based Recommendation Engine)

- Built a movie recommendation web application that suggests similar movies based on the user's selected title using content-based filtering with Cosine Similarity.
- Developed a simple and interactive web interface where users can search for a movie and view recommended titles along with their posters.
- Integrated the TMDB API to fetch movie posters, making the recommendations more engaging and user-friendly.
- Tech Stack: Python, Streamlit, Pandas, Scikit-learn, TMDB API.

## Education

Graphic Era University, BTech (Computer Science and Engineering (CSE)), 2022 – 2026

Shri Guru Ram Rai Public School, 12th (Central Board of Secondary Education (CBSE)), 2020 – 2021

The Horizon School, 10th (Central Board of Secondary Education (CBSE)), 2018 - 2019

## Certifications

AWS SageMaker - Great Learning
Credential ID: KEURPWCC | Certificate

Python for Machine Learning - Great Learning
Credential ID: QVEYABHM | Certificate
